## SHADE VARIATION

V3 - Moderate Variation  
While the colors present on a single piece of tile will be indicative of the colors to be expected on the other tiles, the amount of colors on each piece may vary significantly. For example "that little bit of color" on one piece of tile may be the primary color on the next piece.

V4 - Random Variation  
Random Color differences from tile to tile, so that one tile may have totally different colors from that of other tiles. Thus the final installation will be unique.
